

Delivering complex infrastructure with certainty

EVERON

PROFILE

Multidisciplinary Infrastructure Partner

Civil Works & Building
Electrical Infrastructure
Telecommunications

Introduction

Everon Infrastructure delivers integrated rail, infrastructure, building, electrical and telecommunications solutions across complex infrastructure environments.

Formally known as Global Rail Australia and GRA networks, the business has evolved to reflect broader capabilities and a growing portfolio of multidisciplinary infrastructure projects. While the name has changed, our commitment to delivery remains the same.

Working across rail, transport, utilities, energy, telecommunications and public infrastructure, we bring together specialist teams under a single delivery model, helping clients reduce complexity, improve coordination and maintain momentum throughout the project lifecycle.

From enabling works and construction through to commissioning and ongoing maintenance, Everon Infrastructure is built to deliver complex infrastructure with certainty.

About Us

25+ years of infrastructure delivery.

Everon Infrastructure has built a reputation for delivering projects in environments where safety, planning and coordination are critical.

Our capabilities span civil infrastructure, building works, electrical systems, and telecommunications networks, allowing us to provide clients with a single delivery partner across multiple disciplines.

Operating nationally, our teams support projects across rail corridors, transport networks, utilities infrastructure, energy environments, telecommunications systems and public assets.

While the Everon name is new, the experience behind it is not. Built on the foundation of GRA Networks and strengthened by more than two decades of project delivery, we continue to provide the same practical approach, trusted relationships and commitment to quality that clients have come to expect.

Our values

Safety

We prioritise the wellbeing of our people, clients and communities in everything we do.

Respect

We value relationships, act with integrity and treat everyone with professionalism.

Teamwork

We collaborate openly, combining expertise across disciplines to achieve the best outcomes.

Excellence

We continuously improve, striving for quality and delivering work we're proud to stand behind.

Accountability

We take ownership of our work, our commitments and the results we deliver.

Infrastructure Works & Building

Complex infrastructure projects require more than construction expertise. They demand careful planning, strong coordination and the ability to deliver within live operational environments.

Everon Infrastructure delivers civil and structural works across transport, utilities, energy and public infrastructure projects throughout Australia. Our teams work in environments where safety, stakeholder management and operational continuity are critical, providing practical solutions that support project certainty from planning through to delivery.

Our capabilities span enabling works, structural construction, remediation, asset renewal, and specialist infrastructure projects. By combining civil, building, electrical and telecommunications expertise under one business, we help clients simplify project delivery and reduce interface risks across multiple workstreams.

- Railway Station Upgrades & Transport Infrastructure (Design & Construct)
- Education & Community Buildings
- Heritage & Specialist Restoration
- Infrastructure & Structural Infrastructure
- Commercial & Industrial Construction
- Equipment Room & Modular Building Construction
- Utilities & Pipeline Infrastructure
- Refurbishment, Maintenance & Asset Renewal
- Substation Construction & Upgrades
- Demolition, Remediation & Site Preparation

Electrical

Electrical Infrastructure is critical to the safe and reliable operation of modern networks, facilities and public assets.

Everon Infrastructure delivers electrical solutions across rail transport, utilities, telecommunications and industrial environments, supporting projects where reliability, compliance and performance are essential. Our teams work across both new infrastructure projects and existing operational environments, providing practical electrical solutions that support long-term asset performance.

- Commercial & Industrial Installations
- Site Enabling Works
- Bespoke Installations
- Fibre Splicing & Copper Jointing
- Clean Earth Systems
- Electrical Maintenance
- OCMS (Rail Industry)
- Lighting Control Systems
- Building Management Systems (BMS)
- HV & LV Cable Installation & Connection
- Substation Upgrades & New Builds
- Equipment Room Fit-outs
- UPS Installation & Commissioning
- Smart Metering
- CCTV, Access Control & Security System Installations
- Cable Installation & Management

Telecommunications

Telecommunications remains a cornerstone of the Everon Infrastructure business.

For more than 25 years, our teams have delivered telecommunications infrastructure supporting carrier networks, enterprise connectivity and critical communications systems across Australia.

Our capabilities span fibre and copper networks, transmission systems, mobile network deployments, DAS and IBC solutions, technical services, maintenance programs, and emergency response works. We support projects from initial construction through to commissioning and ongoing operational support.

In 2025, Everon Infrastructure was recognised as Nokia's Best Contractor for Delivery, reflecting our commitment to quality, reliability and performance across complex network environments.

- Technical Services
- Twin Rope Access & Rigging Services
- 4G & 5G Equipment Installation & Commissioning
- IBC (In-Building Coverage) & DAS Installation & Commissioning
- Turnkey Greenfield Builds
- Maintenance Services
- Transmission Link Installation & Commissioning
- Tower & Structure Construction, Retrofit, Maintenance & Inspection
- Fibre & Copper Network Distribution & Transmission
- Condition Surveying & Reporting
- Emergency Response

Safety & Compliance

Safety is not a standalone function at Everon Infrastructure. It is embedded in how we plan, manage and deliver every project.

Working across operational environments, live infrastructure and critical assets requires a culture built on accountability, responsibility and continuous improvement. Our teams operate under established quality, safety and environmental systems

designed to support compliance while maintaining practical project delivery.

We believe everyone has a responsibility to contribute to a safe workplace. By combining strong leadership, clear processes and proactive risk management, we create

environments where people can perform at their best while protecting those around them.

Safety isn't simply measured by compliance. It's demonstrated through actions, behaviours and decisions made every day.

Our People

Behind every project is a team of experienced professionals committed to delivering quality outcomes.

Everon Infrastructure brings together highly experienced personnel across infrastructure, building, electrical, telecommunications, project management and support functions. This depth of capability allows us to respond to complex project requirements while

maintaining consistency across delivery.

Our success is built on the experience, commitment and collaboration of our people. We foster a culture in which teamwork, accountability, and practical problem-solving are valued, creating an

environment where individuals are empowered to contribute and grow.

By investing in our people, we strengthen our ability to deliver for our clients, support our communities and continue building long-term relationships across the industries we serve.

Why EVERON

Integrated capability

Infrastructure, building, electrical and telecommunications expertise delivered through a single coordinated team.

Built for complex environments

Extensive experience operating within live infrastructure, transport, utilities and operational environments.

National delivery capability

Supporting projects across Victoria, New South Wales, Western Australia, Tasmania and beyond.

Responsive and agile

Large enough to deliver complex projects, agile enough to respond quickly when conditions change.

Experienced people

A multidisciplinary team of experienced professionals focused on practical solutions and project outcomes.

Delivery with certainty

A proven approach built on accountability, communication and reliable project delivery.

Work with us

Let's talk about your next project.

Whether you're planning a major infrastructure program, network upgrade or specialist construction project, Everon Infrastructure has the capability and experience to help.

Connect with our team to discuss your requirements and discover how we can support your next project.
